Part III EXAMINER'S AMENDMENT AND REASONS FOR ALLOWANCE

1. An application may be required to be restricted to one of a plurality of claimed invention if the claimed inventions are able to support separate patents and are either independent or distinct. M.P.E.P. § 803. Restriction to one of the following inventions has been required under § 803.

· Invention I (claims 1-3 and 7-14), which is drawn to transferring address data, is classified in Class 395, subclass 823.

· Invention II (claims 4-6), which is drawn to transferred data counting, is classified in Class 395, subclass 854.

2. These inventions are able to support separate patents and are either independent or distinct for the following reasons. Inventions I and II are related as AB_{br} and B_{sp} . Inventions in this relation are distinct if it can be shown that (1) AB_{br} as claimed does not require the particulars of B_{sp} as claimed for patentability, and (2) that B_{sp} has utility by itself or in other combinations. M.P.E.P. § 806.05(c). In the instant case, AB_{br} as claimed does not require the particulars of B_{sp} as claimed because a method of transferring a packet of data by transmitting start information, memory address bits, and op code information is patentable regardless of whether count information is also transmitted. B_{sp} , moreover, has the separate utility of minimizing the number of crossings of spatial regions delineated by receiver means and minimize the length of wiring.

Art Unit: 2317

3. These plurality of inventions are distinct and have acquired a separate status in the art because of their divergent subject matter as evidenced by their different treatment and classification, *supra*. In addition, the search for any one of the inventions is not required for the others. Restriction for examination purposes as indicated, therefore, is proper.

5 4. In a voicemail message on May 19, 1997, Roland Cortes provisionally elected without traverse to prosecute Invention I (claims 1-3 and 7-14). Affirmation of this election must be made by applicant in responding to this Office action.

10 5. Claims to inventions not elected are withdrawn from further consideration by the Patent Examiner by the election. 37 C.F.R. § 1.142(b). In this case, claims 4-6 have been withdrawn from further consideration as being drawn to a non-elected invention. The applicant may cancel these claims. Upon the cancellation of claims drawn to a non-elected invention, the inventorship must be amended in compliance with 37 C.F.R. § 1.48(b) if one
15 or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a diligently-filed petition under 37 C.F.R. § 1.48(b) and by the fee required under 37 C.F.R. § 1.17(h).

Art Unit: 2317

6. An Examiner's Amendment to the record appears below. Should the change be unacceptable to applicant, an amendment may be filed as provided by 37 C.F.R. § 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the Issue Fee. Authorization for this Examiner's Amendment was given in a telephone interview with Roland B. Cortes on June 5, 1997.

✓
Cancel claims 4-6 as being directed to a non-elected invention.

7. The following is an Examiner's Statement of Reasons for Allowance. The prior art of record fails to disclose or render obvious a method of transferring a packet of data by first transmitting start information, lower order memory address bits, and first op code information in a first word and then transmitting second and third op code information and upper order memory address bits in a second word wherein these components are transmitted over specific buses and lines of the bus as in claim 1, for example. Any comments considered necessary by applicant must be submitted no later than the payment of the Issue Fee and, to avoid processing delays, should preferably **accompany** the Issue Fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

8. All general inquiries including those relating to the status of patent applications and the receipt of mailings should be directed to the receptionist of Group 2300 whose telephone
